19.00-19.30	Free Time in the Bar		
19.30 - 23.30	Conference Dinner Saturday Evening		
This is the provisional programme			

This conference must be pre booked and pre registered. All participants including speakers are required to register and pay the fee of £100.00 per person per day for the day, (concessions available £49.00) and fill in the booking form. Fees include lunch, the conference dinner and all refreshments, (except evening bar drinks).

A proceedings document will be created from the speaker papers, and this will be lodged with the British Library as a publication and will provide authors with citations. This proceedings document will be available 1 month after the conference in hard copy format. Speakers are requested to provide proceedings, between 2 and 8 pages A4, including a 5 line biography. Speakers and participants who provide papers will be considered for entry in our academic journal, volumes 4 and 5 and our book series.

Green Economics Institute Members reduction £10%. Student reductions available.

Please email greeneconomicsevents@yahoo.co.uk
for further information about the conference and for a booking form.

This Conference will follow the tradition of the Green Economics Conferences which are the world's leading Conference series in Green Economics. Internationally renowned composite, multidisciplinary, scientists, economists, campaigners, Policy makers and Directors, Professors Social scientists and Researchers from all over the globe will present their frontier research findings and to keep up to date with latest achievements and developments in this very fast moving, leading and topical field.

This conference is designed to present the important research and findings of economics by doing and also theoretical ideas about what reforms Green Economics can offer the mainstream and to allow time to think about the issues more fully.

It will feature slow travel experts- come and find out how to get to Copenhagen without using up loads of unnecessary carbon.

The conference will also debate the current economics downturn.

This conference will have longer sessions than usual and allow plenty of time for debate and outcomes.

Green Economics views the current downturn as a clash between ecology and economy and argues that the commodity instability is a symptom the exhaustion of natural resources. The markets are correctly reflecting that and are indicating that traditional economics instruments and derivatives are however no longer any use, and new methods of creating a natural economics of abundance need to be urgently developed.

The world has changed and Green Economics is an economics which is comfortable with long termism- equity, climate issues and biodiversity costs and poverty prevention, and which has been waiting to take the mantle and that time has now arrived!

We look forward to welcoming you to The Oxford University Club, a lovely new bright and airy building overlooking the cricket green in one of the most beautiful cities in the world with outstanding, exciting and famous atmospheric Conference facilities excellent travel connections and accommodation.

Themes include

Preparing for Copenhagen Climate Change Conference,
Poverty prevention, climate change prevention, adaptation, mitigation.

The trade off between economy and ecology plays out in the new battleground for economics and saving the planet.

Economics, development and growth ? Is current economics up to the task of solving our problems?

Do we need more growth, more profit more development or do we need other solutions. Assessing market driven growth and sustainable development. Can we have our cake and eat it.

Green solutions, debating time, slow travel from the top experts in travel innovation and change.
